ANIKET SINGH

SOFTWARE ENGINEER | FULL-STACK & BACKEND DEVELOPMENT

Noida, Uttar Pradesh | singhaniket1821@gmail.com | +91 8707400215
linkedin.com/in/aniket-singh13 | github.com/Aniket-Git2

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience at UST Global in application and full-stack development. Professional experience includes backend API development, frontend modules, database optimization and production support using C#, .NET Core, ASP.NET Web API, Angular, SQL Server and MongoDB. Additional project experience includes Python-based image processing and OCR, along with role-based applications, asynchronous messaging and AWS deployment. Adaptable across technology stacks, with a foundation in software engineering, REST APIs, databases and Agile delivery.

TECHNICAL SKILLS

Programming Languages: C#, Python, JavaScript, TypeScript, SQL
Backend & APIs: .NET Core, ASP.NET Core Web API, ASP.NET Web API, Node.js, REST APIs
Frontend: Angular, Blazor WebAssembly, HTML, CSS
Databases: SQL Server, MongoDB
Cloud & DevOps: AWS (IAM, EC2, S3, Elastic Beanstalk), Docker, Kubernetes, Jenkins
Messaging & Security: RabbitMQ, MassTransit, JWT, ASP.NET Core Identity
Tools & Practices: Git, GitHub, Jira, ServiceNow, Salesforce, Agile, OOP, database optimization

PROFESSIONAL EXPERIENCE

Software Engineer – Full Stack | UST Global | Noida, India | September 2024 – Present

- Designed and deployed 8+ RESTful APIs using .NET Core and ASP.NET Web API, improving API response time by 25%.
- Developed 4+ Angular modules, reducing page load time by 30%.
- Optimized 50+ SQL queries, achieving 20% faster data retrieval.
- Worked with MongoDB to manage 10K+ records and support efficient data handling.
- Collaborated with a 6–8 member Agile team across 15+ sprints to support application development and delivery.
- Diagnosed and resolved 40+ production issues, contributing to a 15% reduction in incident rate.

PROJECTS

HealthAxis – Healthcare Management Platform

- Developed a role-based platform using ASP.NET Core Web API, Angular, Blazor WebAssembly, Entity Framework Core and SQL Server.
- Implemented JWT authentication, refresh tokens, ASP.NET Core Identity and role-based authorization.
- Integrated RabbitMQ and MassTransit for asynchronous appointment-booking event processing and notification generation.
- Built a Jenkins CI/CD pipeline and deployed the application to AWS Elastic Beanstalk; configured SQL Server and RabbitMQ on Ubuntu EC2.

Technologies: ASP.NET Core Web API, Angular, TypeScript, Blazor WebAssembly, EF Core, SQL Server, RabbitMQ, MassTransit, JWT, AWS, Jenkins

Real-Time Image-to-Text

- Built an image-to-text solution using OpenCV for image preprocessing and Tesseract OCR for text recognition.
- Integrated TensorFlow to enhance character detection and recognition; developed real-time text extraction functionality.

Technologies: Python, OpenCV, Tesseract OCR, TensorFlow, Flutter

Air Switch

- Developed an augmented-reality application combining AR and IoT concepts to control electrical appliances through virtual switches.

Technologies: Unity3D, C#, ARKit, Blender

EDUCATION

B.Tech, Computer Science Engineering (Artificial Intelligence) | PSIT College of Engineering, Kanpur | 2020–2024
Intermediate (12th), CBSE | St. Xavier's School, Balrampur | 2020

CERTIFICATIONS

- Claude Certified Developer – Foundations (Credly, November 2026)
- Salesforce Certified; Agentforce Specialist
- SQL Certificate (UST Global); AWS DevOps (Skillsoft); AWS Cloud (Skillsoft)
- TCS NQT; SOC Analyst (UST Global); Python 3 (Udemy)
